CHAPTER 1
FOREIGN TRADE

1

FOREIGN TRADE | ANALYSIS

Foreign Trade is the exchange of capital, goods and services between different countries or territories. The pattern of foreign trade in a country changes along with its economic growth and development. The extent of foreign trade taking place depends upon the comparative advantage of a country. Foreign trade consists of export and import of goods and services.

In 2014-2015, the total foreign trade of Myanmar amounted to 29156.9 million US\$, with export registered at 12523.7 million US\$, while import was valued at 16633.2 million US\$. The trade balance registered a deficit of 4109.5 million US\$.

In 2015-2016 April to September, the total trade was 13499.9 million US\$ in which export was 5611.0 million US\$ and import was 7888.9 million US\$. The trade balance had a deficit of 2277.9 million US\$.

The most important exports in Myanmar were manufactured products, while for imports, the major product was non-electric machinery and transport equipment. A large majority of Myanmar exports go to China, and also main origin of Myanmar imports.

VALUE OF FOREIGN TRADE

In 2014-2015, total foreign trade in Myanmar amounted to 29156.9 million US dollars, an increase of 16.8 % compared to the previous year, Over the same period, domestic exports increased by 14.6 % and general imports increased by 22.9 %.

In 2013-2014, total trade increased by 38.3 % compared to the previous year. Over this period, domestic exports increased by 11.4% and general imports increased by 57.3 %.

The share of domestic exports in all exports was 82.5% in 2014-2015, an increase compared to its share of 80.4 % in 2013-2014. The share of general imports in all imports was 96.1% in 2014-2015, an increase compared to its share of 94.6 % in 2013-2014.

When comparing September 2014 and September 2015, total trade decreased by 27.9%, domestic exports decreased by 17.9% and general imports decreased by 36.7%.

In September 2015, the share of domestic exports in all exports was 77.0% and for general imports it was 96.3%.

NORMAL AND BORDER TRADE

In 2014-2015 compared to 2013-2014, normal exports decreased by 2.5%, border exports increased by 55.5% and normal and border imports have increased, normal imports by 18.5 %; and border imports by 36.5 %.

In 2013-2014 compared to 2012-2013, normal and border trade have increased, both for imports and exports; normal exports by 23.4% and normal imports by 52.4%; border exports by 29.4% and border imports by 47.5%.

The share of normal exports in total exports was 65.7% in 2014-2015, a decrease compared to its share of 75.4% in 2013-2014. The share of normal imports in total imports was 85.0% in 2014-2015, a decrease compared to its share of 86.7% in 2013-2014.

■ **TRADE BY SECTOR**

In 2014-2015, both government exports (17.5%) and imports (8.5%) increased compared to the previous year. Over this period, private exports (5.0%) and imports (23.7%) also increased compared to the previous year.

In 2013-2014, both government exports and imports increased compared to the previous year, by 33.7% and 67.1% respectively. Over the same period, private exports and imports increased, by 15.6% and 48.6% respectively.

The share of government exports in total exports was 57.2% in 2014-2015, an increase compared to its share of 54.5% in 2013-2014. The share of government imports in total imports was 16.6% in 2014-2015, a decrease compared to its share of 18.4% in 2013-2014.

■ **TRADE BY MAJOR TRADING COUNTRY**

China is, by far, the main destination for Myanmar exports: it represented 37.3% of total exports in 2014-2015 and nearly half 26.0% in 2013-2014. In 2014-2015, the next four largest destinations are Thailand (32.2%), Singapore (6.1 %), India (6.0 %) and Japan (4.4 %). In 2013-2014, the same countries were the main destinations for exports, with Singapore moving from the fourth to the third place between 2013-2014 and 2014-2015.

China is the main origin for Myanmar imports: imports from China represented 30.2% of total Myanmar imports in 2014-2015 and 29.8% in 2013-2014. In 2014-2015, the next four main origins for imports are Singapore (24.9% of total imports), Japan (10.5%), Thailand (10.1%) and Malaysia (4.5%). The previous year, main partners for imports were Singapore (21.2%), Thailand (10.0%), Japan (9.4%) and Republic of Korea (8.9%).

■ **TRADE BY COMMODITY GROUP**

Exports are presented according to seven main groups of commodities. In 2014-2015, the most important exports were manufactured products, agricultural products and mineral products. Within these groups, the major products are rice, matpe, maize, green mung bean, pesingon and sesame seeds for agricultural products; gas and garment for manufactured products; and, jade for mineral products.

Imports are presented for three main groups, of which, the two main ones in 2014-2015 are capital goods and intermediate goods. The major products are non-electric machinery and transport equipment, base metals and manufactures, electric machinery and apparatus for capital goods, and refined mineral oil, edible vegetable oil and other hydrogenated oil for intermediate goods.

■ **EXPORTS AND IMPORTS OF PRINCIPAL COMMODITIES BY COUNTRY**

In September 2015, major commodities exported to China are jade, gas, base metal and ores, green mung bean, maize, sesame seed, rice and broken rice and main exports to Thailand are gas, fish and fish product and matpe.

Main commodities imported from China are electric machinery and apparatus, non-electric machinery and transport equipment and base metals and manufactures while major imports from Thailand are non-electric machinery and transport equipment, cement, electric machinery and apparatus and plastic.

CHAPTER 2
PRODUCTION

2

PRODUCTION | ANALYSIS

Production statistics represent the volume of production of selected manufacturing commodities, electric power generation, precious minerals and pearls, non – metallic minerals and production of meat, fish, milk and egg.

In 2014-2015, electric power generation and sales increased, while the average price of electricity increased. Production of precious minerals increased for most of gems, whereas production of minerals mainly increased. Production of meat rose for all types of meat and fish, as well as the production of egg.

■ PRODUCTION BY THE STATE ECONOMIC ENTERPRISES

Among selected commodities produced by the State Enterprise the volume of production of most of these commodities declined in 2014-2015 compared to 2013-2014.

The most important increases were recorded for the production of biological products, cotton yarn and kerosene: the production of biological products (in thousand dosage) increased by 154%; the production of cotton yarn (in thousand lb) increased by 2.45%; the production of kerosene (in thousand gal) increased by 4.49%.

Due to the leasing of factories and privatizations, some commodities are no longer produced by State Enterprises. Since May 2013, brick factories are leased to the private sector; asbestos ceiling and blanket factories were also leased while soap and paper production was privatized.

■ PRODUCTION BY THE PRIVATE ENTERPRISES

The production of the selected commodities by Private Enterprises increase in 2014-2015 compared to 2013-2014.

The most important increases were recorded for the production of cooking oil, instant noodle, ready made garment, cement, hardwood conversion, plywood and hardwood, fertilizer and battery; the production of plywood and hardwood (in thousand sq.ft) increased by 27.09%; the production of cement (in metric ton) increased by 70.70%; the production of fertilizer (in metric ton) increased by 9.81% ; the production of battery (in thousand no.) increased by 12.14% and the production of hardwood conversion (in cu.ton) increased by 4.96%.

■ PRODUCTION OF ELECTRIC POWER

Table 2.3 presents electric power generation and sales in Myanmar. Since 2014-2015, the installed capacity is 4805 megawatts. The generation increased by 15.59% between 2013-2014 and 2014-2015.

The total volume of electricity sales increased by 17.08% over the same period. Volume of sale to households (column 4) increased by 9.27%, volume of sales to bulk (hotels, schools, hospitals, offices) increased by 3.69% and volume of sales to industries by 10.58% .

The high increase for the category “Others” is due to the fact that since August 2012, this category now includes private companies.

The price of 1 kwh (unit sold) was 52.86 kyats in 2013-2014, and this unit price has increased to 74.14 kyats in 2014-2015.

In 2013-2014, the share of generation that was not sold (unit loss) was 21.51% and it has decreased to 20.50% in 2014-2015.

Table 2.4 presents electric power generation by type of energy. Between 2013-2014 and 2014-2015, thermal declined by 49.81%, diesel increased by 6.80%, hydroelectricity (hydel) increased by 0.06% and gas increased by 78.11% .

Hydroelectricity is by far the main type of energy in Myanmar: it represented 72.04% of the total in 2013-2014 and declined to a share of 62.37% in 2014-2015.

PRODUCTION OF PRECIOUS MINERALS AND PEARLS

The production of pearls increased in 2014-2015 compared to 2013-2014, by 20.76%.

The production of all other types of precious minerals increased over the same period, by 10.77% for jade, by 12.05% for rubies, by 6.34% for sapphire and by 17.81% for spinel.

Jade production includes those of public and private enterprises; gems include public, private and joint venture production while pearls include public and joint venture production.

PRODUCTION OF MINERALS

The production of minerals in the country mostly increased : dolomite by 450% , lime stone by 163.80% and gypsum by 73.52% in 2014-2015 compared to 2013-2014.

Tin concentrated decreased over the same period, by 21.59%. Since August 2013, coal production includes joint venture.

PRODUCTION OF MEAT, FISH, MILK AND EGG

The number of slaughtered for cattle, sheep/goat and pig has increased 8.24% , 31.39% and 3.68% respectively between September 2014 and September 2015.

The production of meat has increased for beef, mutton, pork, fish and chicken by 8.62%, 31.44%, 3.67%, 3.15% and 16.13%. Duck has decreased 13.51% in September 2015 compared to September 2014. The consumption of fish and meat by households remains comparable to the last year. Most of Myanmar people usually eat fish, chicken and pork.

When looking at yearly data, the increase was even higher.

The number of slaughtered for cattle, goat /sheep and pig has increased by 8.4%, 13.8% and 12% respectively in 2014-2015 compared to 2013-2014 .

The production of meat has increased for all type of meat in 2014-2015 compared to 2013-2014: mutton has increased by 13.8%, beef, pork and chicken by 8.3%, 12%, 9.4%, duck and fish by 6%, 5.3%. The production of hen egg and duck egg has risen by 8.7% and 6.6% respectively between 2013-2014 and 2014-2015.

Data for the production of meat is shown in thousand viss (1viss = 1.6329 Kilogram).

CHAPTER 3
PRICES

3

PRICES | ANALYSIS

Prices comprise of the retail prices of selected commodities, the Consumer Price Index (union) and Rate of Inflation, Spot price of gold at Yangon.

Prices of individual commodities change on the basis of demand and supply. Changes in price levels of goods and services in Myanmar that most people buy for their day-to-day consumptions are measured by the Consumer Price Index. This indicator can be used to measure the rate of inflation, which is equivalent to the decline in the purchasing power of the Myanmar currency “Kyat” Price level changes are closely monitored in any economy because they are used to measured inflation.

The average inflation rate in Myanmar was recorded at 8.67% in September of 2015. In the Consumer price index, about two-thirds (68 percent of total weight) is from food while a third goes to non food (32 percent).

■ CONSUMER PRICE INDEX AND RATE OF INFLATION

Consumer price index (CPI) is a widely referred indicator that draws the attention of policy-makers, decision-makers, entrepreneurs and investors and which also concerns the general public. It shows the changes in the prices of specific consumer items in a representative consumer market basket related to a base period which represents a fairly normal period in so far as possible.

The prevailing CPI in September 2015 is 214.31 while the CPI in September 2014 was 186.04. In consequence, Year on Year inflation, comparing the two months is 15.19 percent.

If the CPI in September 2015 is compared with the previous month CPI, it has increased by 0.92 percent due largely to the increase of prices for food, which represent an important weight in the CPI consumer items. In this month, the price of Food Items are noticeably going up such as rice, groundnut oil, sesame oil, pork, Beef, Mutton, most kind of fresh fish and Dried fish, some vegetable, Beans, Dried Chillies, betelnut Garlic (single) and onion (big) but some food prices are significantly going down such as palm oil, chicken, chicken eggs, lobster, shrimp, some fish, potatoes and Betal leave.

CHAPTER 4
FINANCE

4

FINANCE | ANALYSIS

This chapter deals with money supply, people's savings, treasury bonds, domestic interest rates, foreign exchange rates, revenue from taxes and customs duties. Money supply increased in 2013-2014 not only as far as currency in circulation but also in terms of demand deposits. People's savings in Myanmar have increased and almost two quarters of these savings went to private banks in the current year. Starting from June 2014, interest rates for agriculture loans were changed from 8.5% to 5.0% per annum. According to the Customs Department, import duties have increased 36.4% in 2014-2015. During 2015-2016 fiscal year, the exchange rate with US dollar has been reached at 1287 kyats per one US dollar in September.

■ MONEY SUPPLY

The total money supply in the country increased by 15.88% in 2014-15 over the previous year. State owned banks represented 58% of total demand deposit in 2013-14 and 47% in 2014-15 respectively. Currency in circulation has increased by 10.05% in 2014-15 compared to 2013-14. Over the same period, demand deposits have increased, both for State owned banks and private banks, by 7.68% and 63.27% respectively.

■ PEOPLE'S SAVINGS

In March 2015, the Central Bank of Myanmar revised people's savings data series from January 2011 to present according to the IMF's Standardized Report Forms. The total people's savings increased by 23.89% 2014-15 over previous year. Private Banks represented 74% of total savings deposits and 95% of total time deposits in 2013-2014. These shares have increased in 2014-15, where private banks represented 75% of total savings deposits and 98% of total time deposits. Except for "Other deposits", people's savings in Private Banks are higher than in State owned banks. Most people choose savings deposits.

■ TREASURY BONDS

There are three types of treasury bonds; five year treasury bonds are mostly used in 2014-2015.

■ DOMESTIC INTEREST RATES

Over the period 2012 to 2014, the domestic interest rates did not change, except for agriculture to farmers where the interest rates decreased from 8.50% to 5% on 1st June 2014 in the private sector.

■ FOREIGN EXCHANGE RATES

Table 4.7 shows foreign exchange rates for a selection of countries. The daily reference rate for the last day of the month is presented. Between January and September 2015, the exchange rate with US dollar has increased and reached at 1287 kyats per one US dollar at the end of September 2015.

■ REVENUE FROM TAXES

The total revenue from taxes increased by 32.18% between 2013-14 and 2014-15. The taxes on production and expenditure increased by 21.16% between 2013-14 and 2014-15. It has to be noted that tax dodger can be paid within fiscal year for the income tax, therefore tax revenue can fluctuate every month.

■ CUSTOMS DUTIES

Import duties are divided into two parts, normal and border trade. Normal Trade duty is by far the most important one: the share of normal trade was 82% in 2013-14 and 83% in 2014-15. Total duties have increased 36.4% between 2013-14 and 2014-15.

4.1 MONEY SUPPLY

CHAPTER 5
INVESTMENT

5

INVESTMENT | ANALYSIS

Investment is an important factor to sustain economic growth. Thus, Myanmar has encouraged domestic and foreign investors to invest in various economic sectors. In 2014-15, 66 citizen enterprises and 211 foreign enterprises were permitted to invest. During 2015-16 (April to September), 48 citizen enterprises and 97 foreign enterprises were permitted to invest. Since 1988 up to September 2015, a total pledge amount of 57,500.359 million US\$ in Foreign Direct Investments was recorded.

■ MYANMAR CITIZENS INVESTMENT AND INDUCEMENT

Since 1994, a total of 1,087 citizen enterprises were permitted in Myanmar with a total amount of 6,423,773.00 million kyats invested until the end of September 2015.

Among the investments in eleven sectors of the economy, the leading sectors in 2014-2015 were real estate development with 38.81%, hotel and tourism with 16.77% and transport with 13.40% of the total amount of permitted Myanmar Citizens Investment. Myanmar Citizens Investment of permitted enterprises by sector are shown in table 5.1.

■ FOREIGN INVESTMENT

Since 1988, a total of 992 foreign enterprises from 41 countries of the economy were permitted with a total pledge amount of 57,500.359 million US\$ invested until the end of September 2015.

Among the investments in 12 sectors of the economy, the leading sectors in 2014-2015 were oil and gas with 40.22% and transport and communication with 20.96% of the total permitted amount of foreign investments. The leading investors were Singapore that accounted for 53.64%, U.K for 9.01% and Hong Kong for 7.80% in 2014-2015. Since 1989, the main foreign investors were China and Thailand.

CHAPTER 6
TRANSPORTATION AND TRAVEL

6

TRANSPORTATION AND TRAVEL | ANALYSIS

Transportation statistics comprises of domestic public transport, road transportation and merchant shipping. Domestic Public Transport described freight ton-miles and passenger-miles for Railways, Inland water transport and Airways.

For Railways transport, freight ton-miles and passenger-miles are 504,759 thousand freight ton-miles and 2,122,743 thousand passenger-miles in 2014-2015 and 224,528(p) thousand freight ton-miles and 926,799(p) thousand passenger-miles in 2015 April to September.

For Inland water transport, freight ton-miles and passenger-miles are 282353 thousand freight ton-miles and 96,651 thousand passenger-miles in 2014-2015 and 111,029 thousand freight ton-miles and 28,658 thousand passenger-miles in 2015 April to September.

For Airways transport, freight ton-miles and passenger-miles are 674 thousand freight ton-miles and 153,126 thousand passenger-miles in 2014-2015 and 208(p) thousand freight ton-miles and 69,450(p) thousand passenger-miles in 2015-2016 April to September.

There are 4237682 registered motor vehicles entire in the country in 2013-2014 and 5077699 in 2014-2015.

The total of Registered Motor Vehicles increased strongly in the last two years. This lead to a decrease in Yangon city public and private transport. Among domestic public transport, passengers mainly used Railways transport.

The number of international tourists represent those that entered from the entry-gates of Yangon and Mandalay international airports and border tourism gates. The number of tourists visiting Myanmar grew heavily in the last two years. Tourists were mainly Thai, Chinese and Korean.

DOMESTIC PUBLIC TRANSPORT

Domestic public transport is presented through three indicators: Railways, Inland water transport and Airways. Railways transportation is the main transportation in the public sector with a share of 79.4% of total public transportation in September 2015.

When comparing September 2014 and September 2015, Railways transport decreased by 18.3% for freight ton-miles and decreased by 16.3% for passenger-miles. Inland water transport decreased by 46% for freight ton-miles and 47.5% for passenger-miles when comparing September 2014 and September 2015. Passenger-miles in Inland water transport decreased in 2015 mainly due to new bridges built across the country.

Over the same period, Airways transport decreased by 32% for freight ton-miles and increased by 13.9% for passenger-miles.

ROAD TRANSPORTATION

With the adoption of economic reforms in 2011, the new Government emphasized the importance of sustained, inclusive development of its people. The Ministry of Commerce made a policy reform for car imports. In consequence, many medium income households could purchase new cars, thus car density increased year after year. Total Registered Motor Vehicles has increased by 14.6% in 2013-2014 and by 19.8% in 2014-2015, compared to the previous year. On the other hand, Public and Private Road Transport has gradually decreased from 2012 to 2014.

Yangon City Public Transport includes Bus service and Taxi Service. The transport of passengers by Yangon City Public Transport decreased since April 2014. When comparing September 2014 and September 2015, Bus service decreased by 16.89% for passengers and by 22.93% for passenger-miles.

Yangon City Private Transport includes bus service. When comparing September 2014 and September 2015, the transport of passengers by Yangon City Private Transport decreased by 3% for both passengers and passenger-miles, by 0.5% decreased for number of buses and pick-ups in operation per day, by 1.8% decreased for number of trips per days and 1.9% decrease for gross earnings. As more households could buy new cars, the use of public transports in Yangon has decreased and is replaced by transportation in private cars.

The transport of passengers by Mandalay City Private Transport decreased by 8.4% both for passengers and passenger-miles, by 6.9% for number of buses and pick-ups in operation per day, by 9.2% for number of trips per day and by 8.1% for gross earning when comparing 2013-2014 and 2014-2015. However, the level of passengers using bus service in Mandalay is not very high because people use mainly their own two wheels vehicles such as motorcycles and bicycles rather than private transportation.

MERCHANT SHIPPING

Merchant Shipping data includes foreign trade and coastal trade. Foreign trade means trading of goods by ship from one port to another between different countries. Coastal trade means trading of goods by ship from one port to another in the same country.

When comparing August 2015 and September 2015 for foreign trade, entry increased by 7.3% for vessels and 3.5% for tonnage and clearance increased by 5.3% for vessels and decreased by 24.6% for tonnage. Over the same period, entry for coastal trade decreased by 19.3% for vessels and 12.5% for tonnage, and clearance increased by 2.2% for vessels and does not change for tonnage.

TOURISM

This Section presents the tourism industry up to September 2015. The analysis is carried out for the international tourist arrivals and for tourist arrivals at Yangon and Mandalay international airports by nationality of tourists.

In September 2015, 376862 tourists travelled arrival to Myanmar. The number of visitors entered from the entry-gates of Yangon and Mandalay international airports is lower than that at the other border tourism gates. The contribution of tourist arrivals by land to the total was 70.62%, more than the 24.49% of tourist arrivals by air and 4.88% by sea. The largest amount of tourist by land is 266157 and includes daily or overnight travellers with border pass.

The growth rate of total international tourist arrivals in 2014-2015 is 53.22% compared with 2013-14. Tourism industry was also an activity which increased sharply, one of the fastest rates within the two last years.

The total tourist arrivals in September 2015 is 376862 and the tourist arrivals in September 2014 was 210206 which represents a increase of 79.3% in tourism sector. Over the same period, there were increases in tourist arrivals by sea of 25.3%, by air of 21.9% and by land of 122.2%.

The main nationalities who arrived at Yangon and Mandalay international airports were Thai, Chinese, Korean, French and American. Arrivals from these five countries all increased in 2013-

2014 and 2014-2015, with rises of 34.0%, 15.6%, 11.9%, 23.5% and 12.3% respectively in 2014-2015 compared to 2013-2014.

When tourists arrivals at Yangon and Mandalay international airports are disaggregated by sex, we find that Male represent 52% and Female 48% of the total tourist arrivals in 2014-2015 and Male represent 55% and Female 45% of the total tourist arrivals in 2013-2014. Male tourist arrivals decreased and Female tourist arrivals increased in 2013-2014 compared to 2014-2015.

CHAPTER 7
LABOUR AND EMPLOYMENT

7

LABOUR AND EMPLOYMENT | ANALYSIS

Labour and Employment is a critical factor in the production of goods and services for both domestic and international use. Thus, the improvement of the quality of the country's labour force and the efforts to make it more productive is very much essential for contributing greatly to the development of the economy.

This chapter deals with the principal statistics of employment through labour offices and overseas employment in Myanmar. It also presents data on the distribution of new registers, job vacancies and placements reported to the job vacancies through labour offices in Yangon and other Regions/ States. The employment opportunities are larger in Yangon Region, but there is also a higher concentration of job seekers in this region. In the whole country, the number of job seekers remains higher than the job opportunities.

■ EMPLOYMENT THROUGH LABOUR OFFICES

The new registered increased by 17.6 percent, vacancies notified decreased by 11.9 percent and the number of submissions made for the vacancies also decreased by 11.7 percent compared to the same month of 2014. Therefore the person placed becomes less by about 7.9 percent in Yangon. In other Regions and States, the new registered decreased by about 1.6 percent, vacancies notified decreased by 50.6 percent while the number of submissions made for the vacancies decreased by 53.1 percent. The person placed becomes less by about 48.5 percent.

When looking at the whole year, the vacancies notified, number of submissions made for the vacancies, persons placed decreased between 2013-2014 and 2014-2015. In Yangon, however there was a downturn in the number registered. In other Regions / States all indicators decreased between 2013-2014 and 2014-2015.

■ OVERSEAS EMPLOYMENT

For overseas employment the main destinations of people from Myanmar are Thailand, Malaysia, Korea, Singapore, United Arab Emirates, Japan and Hong Kong. The bulk of the destinations are Thailand and Malaysia with a contribution of 50.6 percent and 41.3 percent respectively in 2014-2015. The total overseas employment increased by 14.8 percent between 2013-2014 and 2014-2015. The overseas employment increased by about 8 percent for Thailand and 25.7 percent for Malaysia; however, there was a decrease for Korea of 3.3 percent and Singapore of 29.5 percent. It should be noted that the highest increase for the overseas workers over the period April 2014 to March 2015 were recorded for Thailand, Malaysia, Korea, Japan and Singapore. In September 2015, the overall overseas employment increased by 9577, which was 55.7 percent more than the 6152 placements of workers in the same month in 2014.

7.1 EMPLOYMENT THROUGH LABOUR OFFICES

GLOSSARY
AND METHODOLOGICAL NOTES

GLOSSARY AND METHODOLOGICAL NOTES

CHAPTER 1 | FOREIGN TRADE

■ EXPORTS

Domestic exports: exports of national products.

All exports (i.e. Total exports): domestic exports plus re-exports from bond and other than from bond.

Exports are credited to the country of final destination or of ultimate consumption. Exports formerly recorded according to the date of shipment have, since November 1967, been recorded according to the date of completion of consignment.

Figures about exports include government and private exports on trade account. Sale of goods, whether foreign or national to all foreign trading companies are included. All data exclude exports under military accounts. Exports under diplomatic privileges have been excluded since 1966. Exports are valued at F.O.B, Free on Board (ship or other means of international transport), at port or place of dispatch in the exporting country (including export duties, internal taxes and similar charges to the extent that they remain charged on the goods and passed on to the importers).

■ FOREIGN TRADE

The major source of information in compiling foreign trade statistics are export declaration forms and import declaration forms filled-in by the respective exporters and checked by customs officials.

Starting from November 1988, when border trade was opened, exports and imports recorded at border posts were included in the total foreign trade data, in addition to trade registered in Customs declarations. From 1990 onwards, border trade assessment values are determined by Customs Department.

■ IMPORTS

All imports is the sum of goods released directly from Customs wharves for domestic consumption (direct imports for consumption), presented under import and goods passed to the bonded (imports into bond).

Imports are credited to the country of primary origin or production. Imports which had formerly been recorded according to the date of payment of duty have, since November 1967, been recorded as of the date of completion of consignment.

Figures about imports include government and private imports on trade account. All data exclude imports under military accounts. Imports under diplomatic privileges have been excluded since 1966. Imports are valued at C.I.F, Cost, Insurance and Freight, ship or other means of international transport, at port or place of arrival into the country (excluding customs duty and other import charges).

CHAPTER 2 | PRODUCTION

■ PETROLEUM COKE

Since 1995-96 data are expressed in Metric Tons.

CHAPTER 3 | PRICES

■ CONSUMER PRICE INDEX AND RATE OF INFLATION

Consumer Price Index measures the average change in the retail prices of goods and services purchased and consumed by the households. The weights are based on 2006 Household Income and Expenditure Survey conducted by the Central Statistical Organization.

Weights and composition are grouped into eight major categories of goods and services. For computing, the respective CPI groups are selected on the basis of their importance and representativeness. The CPI computation is based on 158 commodities, which are commonly used by most of the households.

■ RETAIL PRICES OF SELECTED COMMODITIES

The Central Statistical Organization collects retail prices of about 192 items of selected commodities for computation of Monthly Consumer Price Index at Union, Regions and States levels.

The commodities prices are collected from 80 townships from Regions and States in the entire country. The collected prices are sent to CSO Head Office every week.

■ SPOT PRICE OF GOLD

The spot price of gold obtained from gold dealer.

CHAPTER 4 | FINANCE

■ DOMESTIC INTEREST RATES

Domestic Interest Rates include central bank rate, interest on treasury bills and bonds, deposit rates and lending rates.

■ FOREIGN EXCHANGE RATES

Starting from 2012-2013, managed the floating foreign exchange rate is used. Starting from 1st April 2013, the daily reference foreign exchange rates are obtained from Central Bank of Myanmar. The daily reference rate for the last day of the month is used for valuation.

■ MONEY SUPPLY

Money supply consists of currency in circulation and demand deposits for state owned banks and private banks.

Currency in circulation consists of notes and coins held by the general public, cash balance of ministries and departments, state economic enterprises, development committees and also includes notes and coins held by the hand balance chest of the banks. Notes and coins in the currency chest of the Central Bank of Myanmar and other banks are excluded.

■ PEOPLE'S SAVINGS

People's savings are savings deposits, time deposits and certificates of Savings Division at the Myanmar Economic Banks and private banks, which also accept savings deposits and time deposits. Savings deposits and time deposits are accepted at all Myanmar Economic Banks savings branches as well as at all private banks to promote domestic saving under the new Savings Bank Law which was enacted on 11 June 1992.

Savings certificates are issued by the state-owned banks under the new Savings Bank Law 1992, and they are currently issued in varied denominations of Kyat 1,000, Kyat 10,000, Kyat 100,000, Kyat 500,000 and Kyat 1,000,000 which will mature after completion of twelve years from the date of issue. At the option of the owner, savings certificates may be redeemed at any time after twelve months from the date of issue with accrued interest for relevant period.

■ REVENUE FROM TAXES

Revenue from Taxes consists of commodities and services tax, commercial tax, state lottery, stamp duties and income taxes.

■ TREASURY BONDS

The Central Bank of Myanmar has issued two-year treasury bonds since 1st January 2010. Three-year treasury bonds and five-year treasury bonds are issued with effect from 1st December 1993 at the Central Bank of Myanmar with a view to giving an opportunity for the public and private enterprises to save and developing a capital market.

CHAPTER 5 | INVESTMENT

■ FOREIGN INVESTMENT

Foreign Investment Law (FIL) was enacted on 2nd November 2012. Foreign Investors can set up their business either in the form of a wholly foreign-owned or a joint venture with any partner (an individual, a private company, a cooperation society or a state-owned enterprise). Any system included in the Mutually Agreed Contract.

■ MYANMAR CITIZENS INVESTMENT AND INDUCEMENT

The Myanmar Citizens Investment Law (MCIL) was enacted on 29th July 2013. Myanmar Citizens Investment can set up their business in the form of private company, public company and joint venture with local companies according to the existing (MCIL) Law.

CHAPTER 6 | TRANSPORTATION AND TRAVEL

■ AIRWAYS TRANSPORT

The data include all traffic for the public sector both revenue and non-revenue, performed by the Myanmar National Airlines on scheduled services, non-scheduled services, special and charter services.

■ INLAND WATER TRANSPORT

Data relate to all traffic of powered vessels of the government functioning on commercial lines.

■ PASSENGER CAR

Cars which can accommodate a maximum of 8 passengers are classified as passenger cars. Ambulance, fire fighter, hearse, water bowser, oil bowser, pole carrier, vehicles for drilling, dump truck, concrete mixer truck and tractor head and trailer are also included.

■ PASSENGER-MILE

One passenger-mile corresponds to the transport of one passenger over one mile.

■ RAILWAY TRANSPORT

Data include the operation on all railway lines in the country except railways serving plantation, forests, mines or industrial plants. Statistics relating to diesel locomotives do not include diesel rail cars.

■ SHIPPING

Data exclude vessels on government duty including military, pleasure craft and fishing vessels. A ship entering or leaving Myanmar waters from or to a foreign port is counted only once, irrespective of the number of ports it enters.

Registered tonnage is the total volume of all enclosed space of vessel (gross tonnage) minus space not used for passenger or cargo.

■ TON-MILE

One ton-mile corresponds to the transport of one ton of freight over one mile.

■ TOURISM

A tourist is defined as a person travelling to and staying in places outside their usual environment for one purpose (United Nation World Tourism Organization's direction).

CHAPTER 7 | LABOUR AND EMPLOYMENT

■ EMPLOYMENT THROUGH LABOUR OFFICES

Employment through Labour Offices means job-seekers who are registered at Township Labour Offices-16 in Yangon and 61 labour offices in different Region and State.

■ OVERSEAS EMPLOYMENT

Department of Labour is providing services (through overseas employment licensed agencies) for overseas employment in fast and easy way and signing MoUs and Bi-lateral agreements with labour receiving countries.
